

FENS Call for ideas for 2021 training activities

We would like to draw your attention to a call that was recently launched on the FENS website. Scientists from all domains in neuroscience are invited to suggest their ideas for topics and themes to support the 2021 FENS educational and training programme:

- [CAJAL Advanced Neuroscience Training Programme](#): in partnership with IBRO, The Gatsby Charitable Foundation, the University of Bordeaux and the Champalimaud Foundation, FENS offers a programme of 2-3 week hands-on training courses. The advanced training courses may be either purely technical or have a topic-related focus within a framework of technical advances. Six courses are organised per year.

- [FENS Summer and Winter Schools](#) in collaboration with the Society for Neuroscience and the Hertie Foundation respectively. FENS summer and winter schools last 1 week and are focused on defined topics in neuroscience. Chaired and taught in intimate settings by invited international renowned experts, FENS schools offer a framework where PhD students and early career scientists may expand their professional horizon, get exposed to new ideas and discuss concepts of modern neuroscience in an informal atmosphere.

- [The Brain Conferences](#) establish a series of high-level meetings on neuroscience in Europe. Organised by FENS in collaboration with The Brain Prize, these bi-annual conferences bring together outstanding researchers in key areas of contemporary neuroscience to discuss current concepts and define challenges for future research. They usually last 4 days.

Further practical information is available here:

<https://www.fens.org/Training/CAJAL-programme/Call-for-Ideas-2021/>

We would encourage you to spread this call to all members of your society and your network in order to help us improve our 2021 educational and training programme. The deadline for submitting your ideas is **30 September 2019**.

Kind regards,
FENS Administration
